

17th and 18th Century Encyclopedism

Resource Guide

Editions of Diderot's *Encyclopédie*, Chambers *Cyclopædia* (and related material)
in the Sheridan Libraries

The desire to gather all the world's knowledge into one book is as old as civilization itself. The period of **The Enlightenment** gave birth to many such enterprises, as the rapid expansion of scholarship made it impossible to keep up with the increase in publishing and the numbers of original sources to consult. Drawing on the tradition of commonplace books, and responding to a need for easy access to a compendium of knowledge, encyclopedias flourished during the late 17th and throughout the 18th centuries.

The Sheridan Libraries own important editions of these pivotal works, including Diderot's *Encyclopédie*, and its predecessors such as Chambers' *Cyclopædia*, as well as its successors such as the *Encyclopédie Méthodique*.

This guide is in six parts:

1. Editions of Chambers' *Cyclopædia*
2. Editions of Diderot's *Encyclopédie*
3. Editions of other 17th and 18th century encyclopedias
4. Artifacts and specialized teaching resources
5. Selected Bibliography of Secondary materials
6. Relevant Electronic Resources and Web sites
