

Using RefWorks with LaTeX to create bibliographies

Write-N-Cite feature in RefWorks is not compatible with LaTeX, however you can use the One line/Cite view option from within your RefWorks account to insert your citations to your LaTeX document

Using One Line/Cite View

One Line/Cite View Compatibility (Compatible with Netscape 6.0 and above, IE 5 and above, Mozilla 1.2.1 and above, and, as of this release (March 27, 2003), compatible with Safari beta release)

Citing References

To cite a reference in your paper do the following:

Click on the Cite link next to the appropriate reference. A Citation Viewer window will appear containing the citation formatted like {{54 Johnson;}}.

To cite a second reference in the same location just click on the Cite link by any other reference. (If you are using a Macintosh, you will need to click twice - the first click will activate the RefWorks program the second will perform the Cite function. This is due to Macintosh functionality not the RefWorks program.)

Once you have all of the references you need for a particular in-text citation, click on the Select Citation button.

Perform a Copy command or simply drag and drop the citation into your word processor document.

Go to your word processor, click on the document where you want the citation inserted and Paste the citation.

Be sure to Clear the Citation Viewer window before creating your next citation.

Click on the View link to see the entire reference and to access the Edit command if you want to make changes.

Creating a Bibliography

Save the document you have just created before formatting the paper and the bibliography.

Click on the Bibliography button from the Citation Viewer window or from within the RefWorks program.

Select the Output Style you need and the paper you have just created as your document.

Click on Create Bibliography.

You will have to save your file as a Rich Text Format-RTF file before generating the Bibliography.

Should you have any further questions or concerns, do not hesitate to contact support@refworks.com. They are always happy to help.
